

ATO Ready

NIST 800-53 · FEDRAMP · STIG · CMMC
CONTINUOUS · GOVERNED · TRACEABLE

Move from months of ATO preparation to continuous authorization readiness.

ATO Ready continuously exchanges machine-readable evidence, maps system changes to impacted controls, and updates a live Authorization Digital Twin, giving reviewers explainable AI decisions and a current, mission-informed risk posture.

From Manual ATO to Continuous Readiness

Before

Manual Evidence Collection

Evidence Sprawl

Point-in-Time Reviews

Static Risk Assessments

Assessor Friction

After

Machine-to-Machine Evidence Exchange

Live Authorization Digital Twin

Continuous Control Intelligence

Dynamic, Mission-Informed Risk Scoring

Explainable AI Review

How ATO Ready Maintains a Live Authorization Digital Twin

ATO Ready connects to your delivery environment & continuously evaluates meaningful changes against tailored authorization requirements.

Connect

Integrate with development, security, & operational tools.

Ingest

Capture relevant code, configurations, documentation, & evidence as they change.

Assess

Apply tailored controls & authorization requirements to identify risks & recommended actions.

Report

Produce current, auditable findings linked to controls & source evidence.

Every meaningful change triggers a traceable assessment, keeping findings and evidence current as the system evolves.

ATO Ready turns continuous system change into current, auditable evidence assessors can trust.

ATO Ready, Powered by Midas

Midas is the orchestration platform for building governed, auditable AI applications in mission-critical environments. ATO Ready is delivered as a configured Midas solution, tailored to your environment, controls, workflows, and authorization process. **Built on Midas. Configured for the mission.**
